WORK EXPERIENCE

Graduate Engineer Trainee HCL Technologies

08/2022 - Present

Nagpur

I have 1.8 years of experience in HCL and helped me to learn .NET Full Stack development, Core Java and SQL. We learned ADO.NET, ASP.NET MVC and WEB API. We created .NET Applications using ASP.NET MVC and WEB API.

EDUCATION

Study Program Rsr Engineering College

Kavali

SKILLS

.NET Full Stack

Core Java

SQL

CAPSTONE PROJECTS

e-commerce website

- I developed an online shopping webpage that features robust functionality for users to enhance their shopping experience. The webpage allows users to search for items seamlessly and add their desired products to a virtual cart. This intuitive design ensures a smooth and efficient shopping process, providing a user-friendly interface to online shoppers. The project demonstrates my proficiency in web development and my ability to create practical, real-world applications.

TRAININGS

.NET Full Stack

I have received comprehensive training in .NET, equipping me with the knowledge and skills to develop high-quality, scalable applications. This training has covered various aspects of the .NET framework, including object-oriented programming, web development with ASP.NET, and integration with databases. I have gained hands-on experience in writing clean, efficient code, debugging complex issues, and employing best practices in software development.

Core Java

I have received thorough training in core Java, providing me with a solid foundation in object-oriented programming and various fundamental concepts of the language. This training has encompassed essential topics such as data structures, algorithms, exception handling, multithreading, and Java APIs. I have gained hands-on experience in writing efficient, reusable code and developing console-based and GUI applications.
