Academic Details

- **Bachelor of Engineering (B.Tech.) Computer Science Engineering**
Dr.A.P.J. Abdul Kalam Technical University
(2018-2022)

Soft Skills

Analytical | Collaborator | Leader | Adaptable

Technical Skills

- **Programming Languages:**
C# Programming
- **Frameworks:**
.NET Core,ASP.NET Core

Core Competencies

Software Development Life Cycle

Restful API

Debugging

Web Services

Web API

ADO.NET

SQL Server

OOPS

Entity Framework

GitHub Desktop

Personal Details

Date of Birth: 25th July 2001

Languages Known: English and Hindi

Address: Noida, UP

Profile Summary

- A detail-oriented professional with **experience of nearly 2 years** in Software Development in the Entertainment industry.
- Experienced as a Software Developer Engineer at Impressico Business Solutions, showcasing proficiency in **C#,ASP.NET Core,ASP.NET MVC and MS SQL Server** fundamentals, leading to successful project outcomes.
- **Successfully optimized system performance and reduce downtime** by enhancing edge server monitoring efficiency, showcasing a strong commitment to improving system performance and uptime metrics.
- Developed a Reverse proxy server in C# to efficiently route requests to origin server and also **handled Thundering Herd problems using Thread Scheduling**.
- Identified the bottlenecks in the existing DNS and implemented scalability to **reduce DNS resolution latency from 28ms to 7ms**.
- Proficient in various technology stacks within the **.Net** ecosystem,contributing to streamlined product development process.

Work Experience

Software Engineer

IMPRESSICO BUSINESS SOLUTIONS | NOIDA,UP

OCT 2022 – PRESENT

Responsibilities:

- Contributed to the design, development, and maintenance of the subscription management system.wrote clean and efficient code and also create test cases using Nunit Framework.
- Led the development of APIs for Configuration job orchestrator in Express to communicate the latest configurations to edge servers over Web socket and implemented functionality in .NET C# to apply the configurations on edges.
- Collaborated with cross-functional teams to ensure seamless integration of new technologies and solutions.
- Provided technical guidance and mentorship to junior team members, fostering a culture of continuous learning and growth.
- Undertook the development of a DNS pipeline to optimize edge server selection based on client geo-location and ISP's BGP routing table.Implemented functionality for creating pull requests using Azure DevOps environment and performing build deployments.

Achievements:

- Streamlined edge server monitoring processes, resulting in an improvement in system uptime and performance.
- Recognized as the best performer in the team for 2023Q4, showcasing dedication and excellence in software development.
- Identified and resolved Thundering Herd problem by implementing Thread Scheduling in Reverse proxy server.

Projects

PROJECT NAME: Presidio Subscription Management

Tools: C#,ASP.NET Core,Entity Framework,SQL Server,Web API

Roles: Software Development, Test Case Creation

Presidio Subscription Management project focus on developing and implementing a subscription-based software solution for presidio, a leading company. The primary objective is to provide Presidio's customers with a seamless and user-friendly subscription managementsystem.

PROJECT NAME : Aramark Culinary Co Pilot

Tools: C#,ASP.NET Core,ADO.NET,SQL Server,Web API

Roles: Backend Developer

Aramark Culinary Co Pilot project aimed to establish a robust fooding platform with a focus on serving the nutritional needs of incarcerated individuals. The primary objective was to facilitate efficient meal planning for juveniles and adult inmates, specifying the quantity of food and protein intake per day.
