Erode, India

A creative thinker and skilled professional with **two years and nine months** of experience as a software engineer, known for my collaborative approach, and aiming to advance my career in the software engineering field.

PROFESSIONAL EXPERIENCE

- I have accumulated **two years and nine months of experience** working with **Angular (12 & 16), Asp.Net WEB API, ADO.Net, Angular JS, JavaScript, TypeScript, Figma, Bootstrap, and MS SQL**.
 - I've successfully migrated our product's front-end framework from **AngularJS(1.3)** to **Angular 12**.
 - I've constructed a framework that encompasses fundamental Angular Material controllers. This serves as a reference point for our junior team members.
 - I've worked as part of the R & D team and implemented many new functionalities.
 - I've managed the hosting of product and project sites on an **AWS server**, serving both staging and production sites through **IIS**.
 - I took part in migrating SQL Server databases between various product versions.
 - Provided training to junior members of our team.
-

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, TypeScript, Angular, Angular Material, Bootstrap, Angular Js

Backend: C#, ASP. Net WEB API

Database Management: MS SQL Server

Software Known : IIS, RedMine, Visual Studio, Visual Studio Code, SQL, FIGMA, HG, GitHub(Basics)

JOB HISTORY

Working as "Software Engineer" from **OCTOBER-2021** to till date at Studiosoft Solutions Pvt Ltd., Coimbatore, India

JOB DESCRIPTION

Product : MarketStudio PIM

Role : Software Engineer

Technologies : Angular JS, Asp.Net WEB API, Angular, JavaScript, TypeScript, HTML, CSS, and MS SQL.

Description : Product Information Management is organizing data stored in different places in one central repository. With content available in ONE central repository, it can be published across all marketing channels almost instantaneously. Rich content includes but is not limited to Images, Videos, PDFs, Specifications, and Literature.

Roles & Responsibilities :

- Developing design documents and establishing the architectural framework in alignment with clients' new requirements before proceeding with website development.
- I upgraded the Frontend framework for the Configuration module (Console) and the Online Catalog Portal (E-commerce site) from AngularJS to Angular 12, and I have released the updated versions.
- I incorporated a spell checker for all text fields through CKEditor, introduced voice-to-text search capabilities, and introduced a feature to star important asset files in our product.
- Enforcing code standards and overseeing the integration of modules completed by junior developers.
- Configuring the deployment of the product build, including its Console (configuration site) and Online Catalog Portal (Ecommerce site), on an AWS server utilizing IIS.

Project : CTC GLOBAL

Role : Software Engineer

Technologies : Umbraco CMS and SQL Server.

Description : It is developed using the Umbraco Content management system for displaying and managing the new announcements, achievements, events .

Roles & Responsibilities :

- I underwent training in Umbraco Content Management System and applied my expertise to this project.

- I upgraded the jQuery version seamlessly, maintained all functionalities, introduced a dynamic events calendar covering five different countries' events, and performed optimization on stored procedures. And effectively resolved issues raised by clients.

Project : FALCON DMP

Role : Software Engineer

Technologies : Angular 12, Angular Material, Bootstrap, TypeScript, Asp.Net WEB API, and SQL Server.

Description : It's like a Portal for managing documents for our clients and customers. It displays the history of tasks for a specific customer, has dashboards based on roles, allows searching, lets you add attachments for reference, and gives admin users the ability to change roles and responsibilities for other users.

Roles & Responsibilities :

- I first created all the screens in FIGMA according to what the client needed.
- I began the FALCON DMP project using Angular version 12, and I added Angular Materials and Bootstrap to it.
- I also made the search screen according to the role of the logged-in user. It displays results with workflow status history, current status, and attachments, including options to download, all within a popup.
- Enforcing code standards and overseeing the integration of modules completed by junior developers.
- Configuring the deployment of the build on an AWS server utilizing IIS.

Achievements

- Successfully modernized existing project Falcon DMP by implementing new technology, specifically Angular.
- Successfully concluded CTC GLOBAL Phase 1 within a six-month timeframe, leading to a successful release across five regions: Malaysia, Singapore, Thailand, Japan, and Indonesia.
- Punctually delivered four product versions, each marked by improved performance, heightened security measures, and unique user interfaces.
- Expertly maintained product functionality by effectively handling client issue calls, R&D inquiries, and ensuring timely issue resolution.

TRAININGS:

- **ANGULAR (02/2021 - 03/2021)**
Completed career upskill program on "ANGULAR 11" at WEGROW TECHNOLOGY
