55%

## PROFILE

As a fresher in **Dot Net full-stack web development**, proficient in Java, JDBC, servlets, RDBMS, and React.js, I am equipped to contribute effectively to dynamic web application projects, leveraging a strong foundation in both front-end and back-end technologies.

## PROJECTS

### Hospital Management System

Technologies used: **Java, OOP, Collections Framework**

#### Contribution:

- The system efficiently manages patient records, including personal information, medical history, and appointments.
- It provides a platform for scheduling appointments between patients and doctors

**GitHub Repository:** Hospital Management System

### Ecommerce website: Frontend Development

Technologies used: **React, Redux, Tailwind CSS, JavaScript**

#### Contribution:

- The frontend is developed using React.js with styling accomplished through Tailwind CSS.
- Navigation, pagination, and cart page functionality are implemented respectively with react-router-dom and state management tool Redux.

**GitHub Repository:** Ecommerce

### Portfolio website:

**Role:** Created a responsive and user-friendly UI for data presentation.

**Website link:** Portfolio

## MINI PROJECT

### User Login page

Technologies used: **Dot Net, JDBC, Servlet, DBMS**

#### Contribution:

- Developed user login functionality using Dot net, JDBC, and Servlet for seamless database interaction.
- Contributed to a secure login page using Dot net technologies, enhancing user authentication and system integrity.

**GitHub Repository:** Login page

## TRAINING

Dot Net Full Stack Developer Trainee at Besant Technologies.

## CERTIFICATION

Completed dot net, HTML, CSS, JavaScript and React JS certification at Besant Technologies.
