Project Profiles

Project #1 (jan-2023 to Till Date)

Project Name : **Wipro Sharp Service Tool**

Client : WIPRO Ltd.

Payroll : Infiniminds Private Limited

Environment : C#, .Net Core 3.1 WebAPI, NUnit,SQL Server DB, Azure ServiceBus, App Service, Azure AD, Blob Storage, Key Vaults.

Description:

This is the internal application related to ticketing portal, where the user login to the desktop application and create the ticket or modify by capturing some data and prioritizes the ticket. Once the ticket is created, it will be sent to the respective department and it will be fixed by them wrt the issue mentioned. Admin can monitor the statistics of incoming and outgoing flow of the tickets and some graphs in the dashboard. For every workflow action, there will be a notification sent to the users tagged to the ticket using SMTP.

Responsibilities:

- Understanding the requirement specification, Design, Development.
 - Worked on the API's – using WebAPI – Developed API's for the requirement and fixed the L1, L2 issues on priority.
 - Responsible for creating DB Stored Procedures, Functions, SQL Queries to support backend functionality.
 - Deployed the APIs in the Azure App Services and VM's
 - Worked on the developing API's for different modules like – Admin Module, Process Module, Login Module (SSO) etc..
 - Worked on writing Unit test cases & achieved more than 90% coverage.
 - Used Best practices in the development.
-

MY STRENGTHS:

- If any of the tasks assigned, I would like to take responsibility as an initiative.
- Willingness and eagerness to learn, and comprehensive problem-solving abilities.
- Flexible and adapt quickly to new working environments.
- Work independently and as part of a team.
- Easily communicates with peers, clients in understanding the requirements.
- Having strong logical and creative thinking skills.
- Responsible for helping colleagues.
- Willing to work on the challenging concepts.
