PROJECT DETAILS

1. JOB PORTAL

Role: Team Member.

Technology: C#, MVC, HTML, CSS, jQuery, JS, Bootstrap, MS-SQL-Server.

Description:

- In a job portal project with three modules—Admin, Employer, and Jobseeker—
 - Admin Module: Manages platform operations, user accounts, job postings, and generates reports for overall activity.
 - Employer Module: Allows employers to create company profiles, post job openings, search resumes, and manage job applications.
 - Jobseeker Module: Enables jobseekers to create profiles, search for jobs, and add resumes either by uploading documents or using an online builder to apply for jobs.
-

2. AGROE-COMMERCE

Role: Team Member.

Technology: C#, MVC, HTML, CSS, jQuery, JS, Bootstrap, MS-SQL-Server, Web API.

Description:

- The Agro E-Commerce and Agrotourism project features three main modules: Admin, Customer, and Owner. In the Agro ECommerce module, Admins oversee the platform, Vendors list and sell agricultural products, and Couriers handle deliveries.
 - The Agrotourism module allows Admins to manage tour listings, Owners to offer and manage Agrotourism experiences, and Customers to book and review these activities.
 - This integrated platform supports seamless agricultural commerce and tourism, enhancing user engagement and business opportunities.
-

3. TEST MANAGEMENT SYSTEM WEB

Role: Team Member.

Technology: C#, MVC, HTML, CSS, jQuery, JS, Bootstrap, MS-SQL-Server.

Description:

- The Test Management System is a web-based project with three main modules: User, Admin, and Expert.
 - Admins manage the platform, overseeing user registrations, test creation, and analytics.
 - Experts design and configure various tests, setting questions and evaluation criteria.
 - Users participate in these tests, view results, and track their progress. The system ensures efficient test administration and comprehensive performance tracking.
-

4. TEST MANAGEMENT SYSTEM [SOFTWARE]

Role: Team Member.

Technology: C#, Ado.net, MS-SQL-Server.

Description:

- The Test Management System is a standalone application designed to conduct psychological tests with three main modules: User, Admin, and Expert. Admins oversee the platform, managing user accounts and test settings.
 - Experts create and configure psychological tests, setting up questions and evaluation criteria.
 - Users take these tests, view their results, and track their progress. The system ensures accurate administration and analysis of psychological assessments.
-
