PROFESSIONAL EXPERIENCE

Full Stack Software Developer

- GAYA SOFTWARE & TECHNOLOGY
- January 2023-Present

RESPONSIBILITY

- Developed and Maintained Business Applications using C#.NET, ASP.NET, ADO.NET, and Entity Framework to meet client requirements.
- Created Responsive User Interfaces Built using HTML, CSS, JavaScript, Angular, and Web Form controls, ensuring an optimal user experience.
- Database Design and managed databases by writing complex SQL queries, stored procedures, triggers, and cursors. Handled DTS Export/Import operations for efficient data management.
- Implemented Object-Oriented Programming Applied OOP principles such as Inheritance, Abstraction, Encapsulation, and Polymorphism to create modular, scalable, and maintainable applications.
- Developed ADO.NET Components ADO.NET data access techniques to connect, retrieve, and manipulate database information using DataReader, DataAdapter, and DataSet.
- Followed SDLC practices for efficient project execution, including requirement analysis, design, development, testing, and deployment.
- An agile Scrum methodology was processed for daily stand up meeting with team members to know the current progress of the project and raise the issue if any.

PROJECT SUMMERY

Gaya Empower ERP | Ongoing

Role: Team Member

Technology: C#, MVC, HTML, CSS, jQuery, JS, Bootstrap, MS-SQL-Server.

Description: Developed a comprehensive ERP system to streamline academic and administrative functions across multiple departments in an educational institution. Key modules include Trainer (session planning, performance tracking), Coordinator (course, batch, and attendance management), Placement (student placements, job postings), Counsellor (student admissions, lead management), and Student (academic progress, fee tracking, scheduling). Additional modules for HR, Admin, and Accounting are currently in development to enhance employee management and financial operations.

HRMS:

Role: Team Member.

Technology: C#, MVC, HTML, CSS, jQuery, JS, Bootstrap, MS-SQL-Server.

Description: The Human Resource Management System (HRMS) is a comprehensive software solution designed to manage and automate various human resource functions within an organization. The system aims to streamline HR processes, enhance employee experience, and improve organizational efficiency by integrating various HR activities into a single platform. The HRMS covers the entire employee life cycle, from recruitment and onboarding to performance management and offboarding. It includes modules for different user roles, such as SuperAdmin, Admin, HR, and Employee, each with specific functionalities to ensure smooth and effective HR operations.

Agro Tourism:

Role: Team Member.

Technology: C#, MVC, HTML, CSS, jQuery, JS, Bootstrap, Web API, MS-SQL-Server.

Description: Agro E-commerce is an online platform dedicated to the trade of agricultural products and services, enabling seamless connections between farmers, producers, wholesalers, retailers, and consumers. This platform also includes an agrotourism module, which promotes agricultural tourism activities and experiences. The agrotourism module features roles such as admin, owner, and customer. Admins manage and oversee the platform's operations, owners can list and manage their agrotourism services, and customers can explore, book, and review these services.
