### Professional Experience & Projects

ExertSense Solution

**Software Engineer** 2023 – Present

#### Development Project:

**School Management Project:** School accountants to manage tuition and other fees by creating invoices for students, generating receipts, and processing refunds efficiently. This system streamlines fee payments and enhances financial transparency.

Developed a School Management Application for a Kuwait-based client to maintain student and parent records using Civil ID numbers.

*Technology: Used .NET.CORE, Blazor & Sql Server.*

Leiten Technologies India Private Limited

**Software Engineer** 2021 – 2023

#### Development Project:

Developed a **Federal Logistics DB** Web Application for Philips Healthcare to manage hospital equipment requests from government entities. The system handles purchase orders (POs) with expected delivery dates and equipment details, enabling Philips employees to provide contract values. It includes role-based access to ensure secure and streamlined operations.

*Technology: Used ASP.Net and Sql Server.*

#### Support Projects:

##### Vishwas:

to manage goods delivery operations. The system enables accountants to create purchase orders (POs), generate invoices based on POs, and process payments. It facilitates efficient preparation and delivery of goods, supporting multiple delivery options, including door-to-door service.

Bug Fixing and new Enhancement Multiple Projects Like Onboarding, Offboarding, Vendor List Management.

*Technology: Used ASP.Net and Sql Server.*
