PROFESSIONAL EXPERIENCE

DSM Soft PVT LTD

Asp.net Developer

April 2022 – Present

Description:

- Milkyway is the employee website of DSM Soft Private Limited, which stores employee information and timesheet details. This website has seen enhancements for the Australian client projects like geospatial and 2D & 3D Mapping projects.
- Milkyway website includes pages for employee information and HR utilization, and it offers numerous updated versions in its latest iteration. The application also securely manages the company's salary process and financial statements.
- The 2D & 3D Mapping projects, from map uploading to delivering maps to clients, can be efficiently managed through this website.
- The database server used in this application is PostgreSQL, which is an open-source, free and highly customizable database system.
- It is user-friendly, easy to understand, and highly accessible. All pages in this application are highly responsive and load quickly.
