CAREER OBJECTIVE

As a full stack developer with a year of hands-on experience in both frontend and backend development, I want to use my skills to build dynamic and responsive online apps. I graduated with a B.E. in Computer Science in 2024 and am committed to further improving my technological skills and contributing successfully to novel initiatives within a progressive firm.

WORK EXPERIENCE

ZARIF QUEST INTERNATIONAL PRIVATE LIMITED

Software Developer

July, 2024- Present

ZARIF QUEST INTERNATIONAL PRIVATE LIMITED

Software Development Intern

January 2024 – June 2024

PROJECTS

- **GlobalEdge web application:** As a **frontend developer**, Building the GlobalEdge Services Web App, featuring service listings, user management, and contact forms for global recruitment, visa and immigration, and digital marketing services.
 - Application Link: <https://globaledge-a6340.web.app/>
 - Team Size: 2
- **Gaming web application:** As a **front-end developer**, I have worked on a deployed project that involves applying logic for number evaluation randomness in a lottery system, optimizing input fields for better user experience, and utilizing Firebase for efficient data storage and management.
 - Application Link: <https://www.kbombaysattamatka.com/>
 - Team Size: 2
- **DREMS (Da Riff Educational Management System):** DREMS is a system that helps schools and colleges manage academic and administrative tasks efficiently. It tracks student activities, evaluates programs, and supports resource allocation. I worked as a **backend developer** on this project, creating APIs like adding students and colleges to improve data management and ensure smooth operations.
 - Application Link: Under Testing.
 - Team Size: 4
- **Dariff Web app:** I worked as a **frontend developer** on Dariff.com, the company's main web app. My responsibilities included everything from styling the interface to making it interactive. I used React to implement functionality, ensuring a smooth user experience and dynamic interactions throughout the application.
 - Application Link: <https://www.dariff.com/>
 - Team Size: 2

College Project :-

- **Jewellery web application:** A jewellery web application built with React and Bootstrap, utilizing hooks like useState and useContext for efficient state management. The app includes comprehensive features such as adding items to a cart, making purchases, and deleting items.
 - Application Link: <https://enterprise-app-two.vercel.app/>
 - GitHub Link: https://github.com/heyitsabd/Enterprise_App
- **College web application:** I'm building a practice college web application called FindCollege.com. It uses Spring Boot for the backend with real-time data reflected from the database. I've created APIs like addCollege, addCourses, signIn, and signUp. On the frontend, I'm using React with the Context API for state management to check if a user is logged in, and I'm handling the styling as well.
 - GitHub Link: <https://github.com/heyitsabd/CllgWebApp>

SKILLS

- **Languages:** Java, JavaScript, TypeScript.
- **Frameworks:** React.js, Springboot, React Native.
- **DB:** MySQL, Firestore.
- **Cloud:** Docker, Firebase.
- **Others:** Marketing, Client Handling, Business strategy building, Postman, HTML, CSS.
