## PROFILE

Motivated and detail-oriented professional seeking an entry-level role to apply and enhance my skills in software development. With a strong foundation in Java, PHP, SQL and a passion for leveraging technology to drive innovation, I am dedicated to delivering impactful solutions that contribute to organizational growth and success.

## PROJECTS

### PLACEMENT MANAGEMENT SYSTEM

- Developed a dynamic, fully responsive web application utilizing MySQL, Bootstrap, and PHP to streamline the recruitment process.
- Implemented key features such as job posting, applicant tracking, and interview scheduling, significantly improving efficiency and organization in managing campus recruitment drives at the college.

### LOGISTICS AND DISTRIBUTION SYSTEM

- The Logistics and Distribution System Project is a robust platform designed to efficiently manage end-to-end logistics and distribution processes.
- It features key modules such as Order Management, Inventory Management, Warehouse Management, and Shipping and Freight Management, ensuring streamlined operations and enhanced organizational efficiency.

## INTERNSHIP

- Enhanced a logistics system at DOERS TECH Pvt Ltd, Coimbatore, using PHP and Bootstrap, significantly improving efficiency and interface design.
- Developed real-time logistics solutions to enhance system functionality and implemented optimized distribution processes, resulting in a streamlined user experience.
