Full stack development in java course from Qspider Hadpsar,Pune. (8 Months)

PROJECT DETAILS:

- **HOSPITAL MANAGEMENT SYSTEM**

Manual queuing at hospitals, where patients take tokens and wait for their turn, can be frustrating. Often, patients travel long distances only to find out that the doctor is unavailable or unable to make appointments. A Hospital Management System (HMS) can address these issues by allowing patients to book appointments from home. The system notifies patients about doctor availability, saving both time and money.

Software's and Tools: - HTML, JAVASCRIPT, SQL, DOTNET.

- **BANK SOFTWARE BY USING JAVA:**

Bank software, also known as financial software, encompasses computer programs and applications designed to streamline operations within the banking and financial services industry. These solutions manage various financial activities, enhance data security, and provide real-time updates on account balances, transactions, and interest accruals.

Software's and Tools: - CORE JAVA, SQL.
