Summary

I am a web developer having expertise in frontend development and exposure to back- end development. I design and develop web applications using the latest technologies to deliver the product with quality code.

Work Experience

Accent Techno Soft

Jul 2023 - Aug 2023

Frontend UI Developer - Project Intern

- Gained hands-on experience in **fetching and handling dynamic data** from APIs using React's fetch and axios, ensuring efficient data retrieval and management.
- Implemented client-side routing using React Router, enabling seamless navigation and improving user experience in single-page applications (SPAs).
- Developed interactive UI components to display fetched API data effectively, utilizing state management techniques for **real-time updates** and enhanced responsiveness..

Career Objective

Eager to expand my skill set through external trainings to help boost all major frontend tech's. Hoping to leverage organizational skills to help Firm introduce time-saving schemes for all executives.

Key Projects / Involvements

AI Powered Movie Web Application [Link](#)

- Developed a robust **authentication system** using Firebase Auth, ensuring secure user login with modular APIs and unique user IDs, while maintaining a responsive and high-performance Netflix-style UI using React JS and Tailwind CSS.
- Integrated OpenAI's GPT-3.5 Turbo API into the search bar, enabling intelligent movie recommendations and **complex category-wise filtering** based on user input, leveraging TMDB API for real-time data retrieval.
- Implemented a seamless **multi-language feature** using Redux Toolkit, allowing users to switch between different languages dynamically, improving user experience and engagement across diverse audiences.
- Technologies Used:** React JS, HTML5, Tailwind CSS, JavaScript, Redux Toolkit, Firebase Auth, OpenAI

Community Platform Backend Application [Link](#)

- Built a structured and maintainable backend using Express.js and **MVC principles**, ensuring modular code organization, reusability, and scalability for future enhancements.
- Developed a robust authentication system with **JSON Web Tokens (JWT)** for secure user login and registration, enhancing data protection and access control..
- Created and tested efficient **RESTful APIs** for user, post, and notification management using Express.js and Mongoose, incorporating data validation, error handling, and middleware for a seamless application experience.
- Technologies Used:** Express.js, MongoDB, Mongoose, Postman

Technical expertise

React.js	
JavaScript	
HTML5	
CSS	
Tailwind CSS	
Redux Toolkit	
Node.js	
Express js	
MongoDB	

Skills / Exposure

ES6	Responsive Web Design
DOM Manipulation	Firebase

Methodology/Approach

Component based architecture
Performance Optimization

Certificates and Awards

- The Complete Web Development Bootcamp from Udemy. (May 2023)
- JavaScript - The complete guide from TCS ION. (May 2024)
- Object Oriented Programming from Simplilearn. (Nov 2024)
- Prepared a research paper and delivered a presentation at the **International Conference on CAIT 2025**

Tools

Git	VS Code	NPM	Babel
React DevTools	Netlify	Webpack	
Parcel			

Education

Master of Computer Application
MCA - 8.1 CGPA
HICAS Jun 2023 - Mar 2025
