PROJECTS

FinBuddy (Finance Management webApp)

[\[Link\]](#)

- This project will involve the development of a "Finance Management Application". Implement login and logout functionality.
- Display a summary of financial status, including total income, expenses, and savings. Provide graphical representation of expenses over time, using **pie charts**, **bar graphs**, etc.
- Expense Management: Add, edit, and delete expense entries. Categorize expenses (e.g., groceries, bills, entertainment).
- Technologies utilized in building this website are **Next.js**, React.js, Node.js, **Shadcn UI**, Tailwind Css, **Drizzle**, Neon, **PostgreSQL**.

E-Commerce (MERN stack Web Application)

[\[Link\]](#)

- Developed a MERN E-commerce web app which emphasizes the comprehensive nature of your project, encompassing both **frontend** and **backend** development.
- Implemented functionalities like signup, **login**, profile, **address section**, **add-to-cart**, and **payment Integration** path and focuses on the user perspective and highlights the app's ease of use.
- Created a feature-rich app with **React.js**, Next.js, Typescript, Node.js, Express.js, Prisma, Tailwind Css, MongoDB and **Stripe payment** gateway.
