Bouclair

Present

E-Commerce

Contributed to enhancing Bouclair Inc.'s e-commerce platform, focusing on seamless user experiences for customers and internal stakeholders.

Duties and Responsibilities

- Developed and maintained core business logic and server-side components using C#, ASP.NET, and ASP.NET Core.
- Designed and implemented RESTful APIs to support platform functionality.
- Leveraged Entity Framework for database interaction, ensuring data integrity and performance optimization.
- Integrated third-party services (payment gateways, logistics, etc.) with the platform.
- Created dynamic, responsive UIs using HTML, CSS, and JavaScript to enhance usability.
- Built fast, scalable, reusable React components to improve user experience.
- Implemented dynamic page updates without reloads for a smoother shopping experience.
- Designed, optimized, and maintained SQL Server databases for customer management, order tracking, and inventory.
- Wrote complex SQL queries to ensure data consistency and performance.
- Applied ASP.NET MVC architecture for better maintainability and separation of concerns.
- Collaborated with UI/UX teams to implement user-friendly designs and optimized front-end performance.
- Participated in unit testing, integration testing, code reviews, and performance optimization to ensure a scalable and reliable platform.
