Profile

Skilled Full Stack Developer with expertise in ASP.Net, AngularJS, Node.js, JavaScript, and C#. Experienced in developing scalable, high-performance web applications and delivering efficient, user-friendly solutions. Strong problem-solving skills and a passion for creating innovative web solutions.

Education

Sri Ramkrishna Institute Of Technology	7.9 CGPA	2022
HSC – S.B.O.A Mat and Hr Sec School, Coimbatore.	84.7%	2018
SSLC - S.B.O.A Mat and Hr Sec School, Coimbatore.	90.8%	2016

Technical Skills

Programming Languages: C#, JavaScript, TypeScript.

Technology: ASP DOT NET, DOT NET Framework 4.5 & 4.8, angular Js, JQuery, node Js, SPFX (React TS), HTML, CSS.

Tools & Utilities : Visual Studio 2019, Visual Studio 2022, VS Code, IIS, Jenkins, BitBucket.

Work Experience – Projects

MS Open Value Web Page

A webpage that provides customers with the information about their Microsoft Open Value product orders and allow them to renew the orders based on the expiration date.

Role: Analyzing, Coding, Manual testing and Implementation.

Domain: Windows, SharePoint OnPrem

Technologies Used: C#, angular Js, ASP .Net, wso2 Service.

Description: Effectively utilized the SPFx Accelerator to streamline dynamic content management within SharePoint Online. I developed web parts, such as carousel, Internal Query Management, and Store details management, to meet the needs of our organization. Reusable web parts helped manage content more efficiently and flexibly.

Console Application To Process Orders

Console application that processes the domain purchase orders, updates the database and sends an email to the clients about the processed orders.

Role: Analyzing, Coding, Manual testing and Implementation.

Technologies Used: C#, ASP .Net, wso2 Service.

Description: The utility is manually run by the client to process the domain purchase orders for a particular date. The utility gets the orders for the given date from the database and processes the orders, to either renew, suspend or delete a domain. These process are done by making an API call provided by the client domain management team. Then the response from the API call is formatted into an .csv document and a mail content is designed from the response and sent to the customer as an email.

SysAdmin Ticket Assignment Manager

An application that efficiently assigns incident tickets to sysadmin personnel with the appropriate expertise for each issue.

Role: Analyzing, Coding, Manual testing and Implementation.

Domain: Windows, SharePoint online Technologies Used: Node Js, SPFX(React Ts).

Description: Developed a client side webpart using SharePoint frame work(SPFX) usingReact Ts, that helps the user to assign an incident ticket to the SysAdmin personnel of right expertise

Google Analytics 4 (GA4) Implementation

Implemented Google Analytics 4 (GA4) to track user interactions across a web application, providing insights into user behavior and engagement.

Role: Analyzing tracking requirements, implementing GA4 events, testing, and validating data accuracy.

Domain: JavaScript, Google Tag Manager (GTM) and Google Analytics 4 (GA4)

Technologies Used: ASP .NET, WEB API, Angular js.

Description: Designed and implemented GA4 tracking to capture key user activities, including:

- **User Authentication Events:** Tracked user login, logout, sign-in, and sign-up events.
- **E-commerce Events:** Monitored cart interactions, checkout process, and purchase completions.
- **User Engagement:** Captured data on page views, time spent on pages, and navigation patterns.

The implementation was done using **Google Tag Manager (GTM)** for efficient event handling and deployment. Data validation was performed through **GA4 DebugView** to ensure accurate tracking.

This GA4 setup provided valuable insights into user behavior, enabling data-driven decisions for improving user experience and business strategies
