Profile Summary

A proactive person with strong organizational and communication skills, multitasking. Highly motivated and adaptable graduate with a strong foundation in problem-solving, teamwork, and analytical thinking.

Education

Bachelor of Computer Applications	2020 – 2023
Master of Computer Applications	2023 - 2025

Project Experience

Eye Hospital Management System – Web Application

- Technologies Used: HTML, CSS, JavaScript, PHP, MySQL
- Developed a comprehensive Eye Hospital Management System to streamline hospital operations, including patient registration, appointment scheduling, and medical record management.
- The system provides an intuitive user interface for both administrators and patients, ensuring efficient data handling and improved service delivery.

Online Shopping Portal – Android Application

- Technologies Used: Android Studio, Java, XML
- Designed and created an Android-based Online Shopping Portal to provide users with a seamless shopping experience.
- The application features product browsing, cart management, user authentication, and secure payment integration. Built using Android Studio with Java and XML.

Food Order Management System – Web Application

- Technologies Used: HTML, CSS, JavaScript, PHP, MySQL
- Engineered a Comprehensive Food Order Management System to streamline the process of ordering and managing food deliveries for restaurants.
- The application allows customers to browse menus, place orders, and track delivery status, while administrators can manage orders, update menus, and generate reports.
