Project

Project Attendance Portal - using Next.js, Python

Developed an automated attendance portal using Next.js for the frontend and Python (Flask) for the backend, integrating face recognition technology to streamline attendance tracking. Implemented a secure user authentication system, real-time webcam integration, and RESTful APIs for seamless data communication and management.

Project Inventory Management – using PHP, MySQL

Developed user-friendly interfaces for inventory updates and reporting, and ensured data integrity through robust backend validation and database management.

Project Blood and Organ Donation – using PHP, MySQL

Created intuitive user interfaces and robust backend processes to ensure secure and efficient handling of donor and recipient information.

Education

Jul 2022 – Apr 2024

Master Degree | Master of Computer Applications | Manonmaniam Sundaranar University
Tirunelveli

Jun 2018 – May 2021

Bachelor Degree | Bachelor of Computer Science | St. Xavier's College (Autonomous)
Palayamkottai
