SUMMARY

With 2+ years of experience as a Dotnet full stack developer, proficient in Asp.net Core MVC, C#, SQL Server, JavaScript and CSS. Currently working as a Programmer Analyst in BLUEBERRY GLOBAL. Seeking to leverage higher proficiency in my above mentioned skill set in a full-time career as a full-stack developer.

WORK EXPERIENCE

Blueberry Global

[PROGRAMMER ANALYST]

01/2023 -Present

Client : ForssaEng Finland

Project : Construction Retail Planning (CRP)

Description :-

The project focuses on supporting and developing the Construction Retail Planning (CRP) system, which helps construction equipment traders generate sales and business intelligence reports. These reports provide insights into sales performance and help identify areas for improvement. CRP is essential for effective supply chain and production planning, ensuring that the right resources, such as labor, machinery, and materials, are available when needed. The project involves managing the CRP application, monitoring batch jobs and reports, handling order tasks with sales staff, processing cancellation reports, and assisting users with database queries.

ROLES AND RESPONSIBILITIES

- Develop features and functionalities according to the requirements by Client.
- Implementing data validation and error-handling processes in ASP.NET to guarantee the accuracy and reliability of customer data and maintain the system's integrity.
- Utilize technologies SQL Server for database development.
- Create and maintain technical documentation of remediated incidents.
- Collaborate both in the team and cross-functionally, and contribute in group decision-making.
- Adding advanced features like real-time reports, multi-language support, and multi-currency handling to make the software user-friendly for businesses worldwide.
