PROFILE

Front-end web developer with expertise in HTML, CSS, JavaScript, jQuery, ASP.NET Core, and ASP.NET MVC. Skilled in building responsive and interactive web applications. Holds a Bachelor of Engineering degree from Anna University with a solid foundation in software development and modern web technologies.

WORK EXPERIENCE

Bytes Evolution Systems 2018– 2021 | 2024– PRESENT Software Development Engineer – I

- Led R&D for Taurussy, using FFmpeg for video and JUCE for audio processing.
- Developed cross-platform UI with HTML, CSS, JavaScript, and jQuery for web, desktop, and mobile platforms.
- Built front-end for BankingQ™, handling complex UI and automation in financial workflows.

Freelancer 2015– 2018 Android Developer

- Developed and implemented core features for Stock Check, a stock market analysis app, focusing on real-time data processing and user-friendly interfaces.
- Led back-end and front-end development for TruckUp, a parcel service and transportation management app, integrating real-time tracking and route optimization.
- Enhanced both projects by applying best practices for code efficiency, UI responsiveness, and ensuring seamless integration with external data sources.

CBS Software Solutions 2014– 2015 Android Developer

- Developed and implemented core features for Stock Check, a stock market analysis app, focusing on real-time data processing and user-friendly interfaces.
- Led back-end and front-end development for TruckUp, a parcel service and transportation management app, integrating real-time tracking and route optimization.
- Enhanced both projects by applying best practices for code efficiency, UI responsiveness, and ensuring seamless integration with external data sources.

LANGUAGES

- English (Intermediate)
- Tamil (Fluent)

TechZar Info

2013– 2014

Android Developer

- Designed and developed a GPS-based Android app for National Location Services, integrating tile-based maps and PostgreSQL database.
- Converted business logic into a tech-driven application, managing map integration and Android functionality.
- Developed a Unit Converter app with Yahoo Financial APIs for money exchange rate conversions and REST client integration.

Soffel Technologies

2012– 2013

Android Developer

- Developed back-end features for Coops Open, integrating REST client web services and Android services for background advertisement processing, providing real-time weigh station status updates based on user input.
- Led front-end UI design and REST client integration for Abirami Mega Mall, enabling users to access cinema products like seat availability, showtimes, and movie ticket bookings.
- Enhanced Smart System Logistics mobile app by implementing additional Urdu language support, enabling users to access package details and contact Smart-System for available loads.
- Designed and developed back-end core functionalities for Payroll Management Systems, including SQLite DB integration, and handled functionality, UI design, coding, and testing of key modules.

COURSES AND CERTIFICATIONS

- Mainframe Application Programming
