Project

Project ERP (Career Module)– using Django, ionic framework

Developed a comprehensive ERP career module using Django for the backend and the Ionic framework for the frontend, enabling efficient career management and tracking. Implemented features such as job postings, applications, and user profiles to streamline the hiring process.

Project Online Car Showroom - using HTML, CSS

Developed an Online Car Showroom using HTML and CSS, featuring an intuitive and responsive design for browsing car models, viewing detailed specifications, and enhancing user engagement. Implemented clean, semantic code to ensure accessibility and cross-browser compatibility.
