PROFILE

As an experienced Full Stack Web Developer with 2+ years of hands-on experience, I am passionate about creating robust and user-friendly web applications. I have expertise in utilizing technologies such as React.js, .NET Core Web API, C#, MSSQL, MySQL, Node.js, and 1 year in Next.js. Proficient in all stages of advanced web development, from initial concept to deployment. Eager to leverage my technical skills and industry knowledge in a dynamic and growth oriented environment, I am well-equipped to contribute effectively to any development team.

WORK EXPERIENCE

Zoi Fintech Services

Oct 2024 - Present

SID - Full Stack -> React JS, . Net Core Web API, MUI, MongoDB

Build an Documentory based web application for kotak. which holds the details of Fund Managers and their Fund details like the product Nav Value, and their current Market Value like that. And the Documentory details will be stored on Local and Global Variable which was more customizable to edit either document or template. Here I have contributed to improve the process by giving an extra features like Aggregate Investment, Fund Management, Index Constituents.

Zoi Fintech Services

June 2023 - Oct 2024

CRM - Full Stack -> . Net Core MVC, Bootstrap 5, MSSql

I'm worked on a Customer Relationship Management (CRM) project, designed to enhance the understanding and interaction between project clients and stakeholders such as managers, CEOs, and sales teams, includes features for adding, updating, editing, and deactivating user leads. Additionally, I implemented functionality to schedule and manage meetings with leads, including start and end dates, times, product details, participants, and descriptions. These details are stored and displayed in an Event Calendar.

Zoi Fintech Services

Dec 2022 - June 2023

HRMS - Full Stack -> React JS, .Net Core API, MUI, MSSQL

I'm successfully contributed in the developement and deployed a comprehensive Human Resource Management System (HRMS), an Employee Portal. This system focuses on storing, adding, updating, and retrieving employee information. I implemented login functionality with role- based authorization for Admin and User. The HRMS includes pages for employee personal details, contact details, qualification details, Apply Leave, Reporting to and Admin based leave summary, and more. Additionally.
