Software Engineer

Contact: 8946084190

Summary

2.6 years of experience in IT as an **ASP.Net/C#/ADO.Net/SQL/SQL Server/Bootstrap5/ CSS3 / HTML5** front end and back end with expert in software design and development with an earned reputation for meeting deadlines and delivering mission critical solutions. Quick learning and adaption towards new technology as needed

Work Experience

Currently working as a Software Engineer in **NICHEBIT SOFTECH**, Chennai from **January 2024** to till date

Previously worked as junior developer in **LEADTECH SOLUTION PVT**, Chennai from **Nov 2021** to **Nov 2023**

Educational Qualifications

MCA (Master of Computer Applications) (2018-2020) in Sastra University, Thanjavur.

BCA (Bachelor of Computer Applications) (2015-2018) in A.V.V.M Sri Pushpam College, Thanjavur.

Core competencies

- Web application development
- Good Team member player
- Code review and Optimization

Tools and Technologies

- Language : HTML5,CSS3,Bootstrap5,C#,ASP.Net,ADO.Net.
- Database : MYSQL, Oracle(SQLDBX)
- Development Tools : Visual Studio 2022.
- Methodology : Agile.
- Version Control : Git.

Project Responsibilities

- Gather requirements and identify requirement gaps
- Handle client communication regarding requirements, etc
- Manage client delight, and build a strong client relationship
- Code review and optimization
- Participate in meetings related to project management (with the client) and related to

Projects Worked

Project	Zing Instra (V4) (client : Chola MS Insurance Chennai)
Role	Software Engineer
Duration	January 2024 – Till Date
Domain	Insurance
Client	Fire Insurance
Technology	ASP.Net,ADO.Net,Web API,Oracle.
Project Description	The project focuses on migrating fire policy data from the V4 system to the Tata Consultancy Services (TCS) platform using a structured three-stage checking process. The aim is to ensure data integrity, compliance, and operational efficiency during the migration. The system will be built using .NET for the application logic and Oracle for the database management, providing a robust and reliable solution for the migration process.
Responsibilities	• Rewriting of this application in .Net webAPI and improve overall Performance of the application • Participating and Discussing the approach for implementing new enhancement along with team members to achieve functionality. • Use .NET applications to extract and validate fire policy records from Oracle databases in the V4 system. • Ensure all mandatory fields are populated and accurate.

Project	Freight Forwarding
Role	Junior Developer
Duration	Nov 2021– Jun 2023
	Logistic
Client	Wiz Logistic
Technology	ASP.Net,ADO.net,C#,Mysql,Sql server,Bootstrap5,Css3,Html5
Project Description	The Freight Forwarding System project aims to develop an advanced logistics platform that streamlines and optimizes the process of managing freight forwarding operations.

Responsibilities	• Rewriting of this application in .Net C# and improve overall Performance of the application • Participating and Discussing the approach for implementing new enhancement along with team members to achieve functionality • Incorporate with team for better quality/performance of code • Working on Ui design improvement of Application.
-------------------------	--

Project	WareHouse
Role	Junior Developer
Duration	Jun 2023 – Nov 2023
Domain	Warehouse
Client	M+R Logistic
Technology	ASP.Net,ADO.net,C#,Mysql,Sql server,Bootstrap5 ,Css3,Html5
Project Description	Warehouse Management System (WMS) project is designed to develop a sophisticated platform that optimizes and automates warehouse operations. This system aims to enhance inventory management, improve operational efficiency, provide real-time visibility into warehouse activities, and streamline workflows. By implementing a comprehensive WMS, the project seeks to reduce costs, improve accuracy, and increase overall productivity within the warehouse environment.
Responsibilities	• Gathering technical requirements and analyzing feasibility from clients. • Involve in communicating with client to get clarifications • Involved in preparation of Unit Tests. • Involve in development phase • Understanding the requirements of the Users and also in analysing the feasibility • Defect Fixes
